Infinity Remote iOS App Operating Instructions

Introduction

This document will guide you through the process required to operate your Wi-Fi enabled Infinity Fire using the Infinity Remote app on your smartphone.

- 1) [Starting the app](#)
- 2) [App Display](#)
- 3) [Starting the fire](#)
- 4) [Flame mode \(manual\)](#)
- 5) [Thermostatic mode](#)
- 6) [ECO mode](#)
- 7) [Stopping the fire](#)
- 8) [Disconnect Wi-Fi](#)
- 9) [Version Info, WiFi Reset and Links](#)
- 10) [Direct Connection](#)

Requirements:

An Apple device capable running iOS Ver. 8.0 (2015) or newer.

Starting The App

Tap the **Infinity Remote App** icon to start the app.

Charlton & Jenrick^{LTD}

INFINITY

Splash Screen
(Displayed for a few seconds)

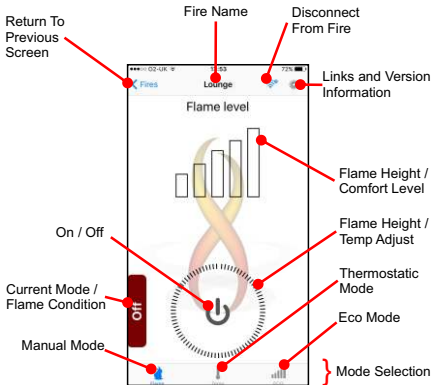

If you only have one fire connected the app will automatically jump to the operating screen. If not select the fire from the list.

The App is now ready to use.

App. Display

Starting The Fire

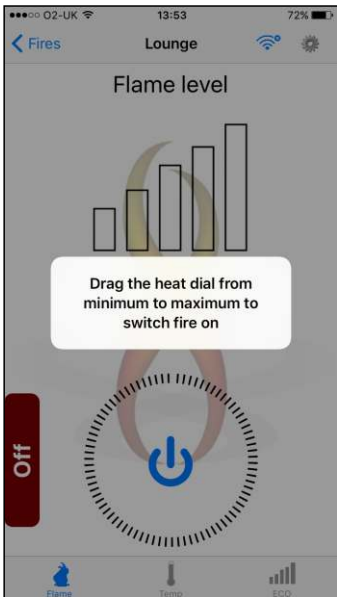

Note:

For Safety reasons there is a three stage process to start the fire as shown in the next three illustrations.

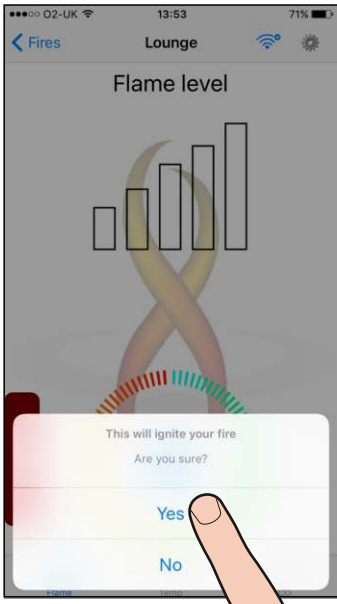

First tap the power symbol  in the centre of the dial.

The above message will be displayed for a few seconds.

Secondly drag the heat dial marker clockwise from minimum to maximum.

Finally select **Yes** and the fire will start the ignition process.

The fire will take a few seconds to start.

Once the fire has lit it needs time to warm up. Condensation may form on the glass until it has warmed up.

Flame Mode

(manual)

FLAME

In Flame mode you can adjust the flame height using the dial.

Drag the dial marker around the dial and release to set the desired flame height and release.

Thermostatic Mode

TEMP

Select **Temp** mode by tapping the **Temp** icon  at the bottom of the display.

Now drag the dial marker around to set the desired temperature (shown in blue above). Then lift your finger.

The thermostat will now be set to the desired temperature.

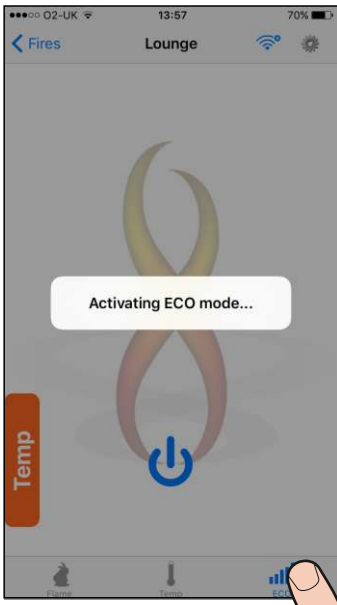

The flame height will now be automatically adjusted up and down to maintain the target temperature.

ECO
Mode

ECO

Select **ECO** mode by touching the **ECO** icon  at the bottom of the display.

In **ECO** mode the flame height will automatically be adjusted up and down.

Stopping The Fire

To stop the fire first tap the Power Button symbol 

Now tap **Switch off** to confirm.

The fire has now been stopped.

Disconnecting The App From The Fire

To disconnect the app from the fire
tap the Wi-Fi disconnect icon  at
the top of the screen.

Demo

Add a new fire

Lounge

The app is no longer connected to the fire. You can reconnect to the fire at anytime by selecting it from the list.

Version Info

Reset Wi-Fi

And Links

To view version information etc. or factory reset the Wi-Fi module tap the Maintenance icon  at the top of the screen.

To return to the previous page tap
<YourFireName.

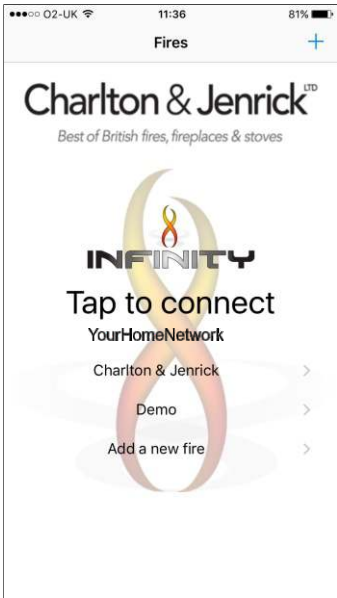

To reset the Wi-Fi connection to factory default settings select
Reset Wi-Fi. ➤

The Wi-Fi connection will be reset and the App will close. You will now have to set up the Wi-Fi again.

Direct Connect

This method of connection can be used to control the appliance if there is no Wi-Fi Network installed in the property or in the event of a Wi-Fi Network Failure

Select "Add new fire"

If you are not already connected to a fire you will be prompted to add one after a few seconds.

Tap the Home button as per instruction 1 above.

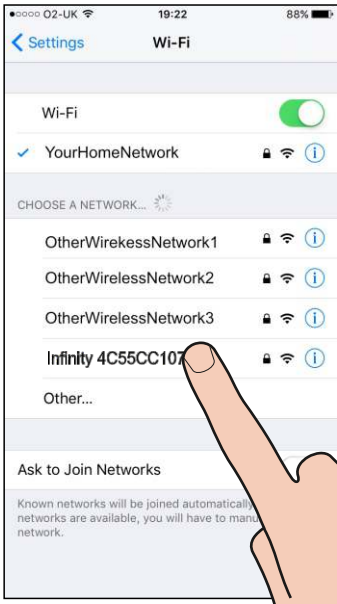

Tap the Settings icon.

Select Wi-Fi from the settings menu.

Select your fire from the list.
Identified as **Infinity** followed by
a serial number.

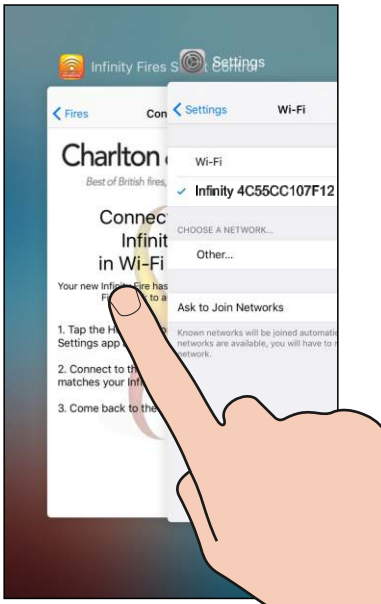

Enter the fire's access code as the password and tap **Join**
(Found on the rear of the product card, packing box and on the Wi-Fi Unit).

Your device is now connected to the fire.

Double Tap the Home button.

Select the Infinity Fire app.
