Electric Collection

CHARLTON & JENRICK
SINCE 1986

CJ Charlton & Jenrick^{LTD}

Introducing The Complete Electric Collection From Charlton & Jenrick

The greatest love begins with a little spark.

Ignite the fire within...

Modern electric fires are the pinnacle of design and the first choice for the discerning consumer who wants looks, ease of use and the latest in technology.

Buy With Confidence

Charlton & Jenrick have been manufacturing and supplying into the Fireplace independent retail market for over 35 years. You are safe in the knowledge that all our products are UKCA and CE approved, meet all current EcoDesign regulations and are at the forefront of innovation. Being both ISO9001 and ISO14001 compliant, you can rest assured that quality products and environmental impact are top of our agenda when creating these stunning fires.

Dedicated Retailer Network

Our expertise is in the innovation, design and manufacture of high tech, high quality beautiful flame products. To ensure you get the best in customer service we work with dedicated local independent retailers that can offer you advice, home visits and support in your local area. You should only find Charlton & Jenrick products available through local independent retailers, which can be found on our website:

charltonandjenrick.co.uk/products/store-locator

We do not sell to national/international retailers and those that sell nationwide via telephone or internet sales. We do this because we truly believe you need to view our products and speak to an experienced retailer who sells our products daily and can help with any advice, surveying your site and any after sales service required. To this end it is a condition of our terms & conditions we have with our dedicated retailers that they themselves look after any technical issues that arise in the first instance because they are in the best place to offer quick local support to a product they fully understand and to you their customer.

This is also a reason why we would strongly advise against you buying any fireplace product (either ours or any other brand) from a distant seller who is not available for local survey, installation and trouble shooting should any issues arise.

Five Year Product Warranty

Our large format electric fires i.e. the iRange Deep, iRange Slimline and Luminosa fires come with a two-year parts and labour warranty, with the option of extending the parts warranty for a further three years if you fill in your warranty registration online within 1 month of purchasing your product.

In all cases regarding warranty please refer in the first instance to the retailer where you bought the fire, this is where your contract lies and in the majority of cases they will be able to get you sorted before passing over to us if they cannot. The Opulus 16" also has the same five year warranty. Our Electric Stoves come with a 12 month parts and labour warranty.

Our Ecoflame 16" & 22" electric fires come with a 12 month return to base warranty. That means in the unlikely event of an issue if you speak with your retailer, they will arrange to take away your fire and replace it for you.

Key features*

Liveflame

Realistic flame effect, with a relaxing flame effect.

Ambient Light Bed

Choose between a range of options or the automatic setting which cycles through the whole range.

Mood Lighting

Optional LED lighting strips can be installed in the fireplace and furniture surround - up to 4m for iRange.

Thermocontrol Remote

Easily control all the features of the fire and view the room temperature too.

Tailored Fuel Bed

You have the choice of ice crystals, coal, or a range of hand painted ceramic logs to finish off your fire.

Ecodesign Compliant

All our electric fires are compliant with the EcoDesign 2022 standard.

App Control

The C&JSmartFire App gives you full control of your fire from your mobile device.

Active Glowing Ember Fuel Bed

Gives you multiple colour and brightness options, for your perfect effect.

Real Flame Technology

Our latest electric flame technology with our sharpest flame effect to date.

*Not all features are available on all models, see individual product pages for details.

iRange

Slimline Range

Liveflame Options

A beautiful fire with flame effects to match your mood.

Relax with the mood enhancing ultra realistic flame effect with three colour options warm amber, bright white and a stunning combination of both colours for the iRange Slimline range. Each available in five mood settings. The mood settings offer five differing levels of brightness and size of flames.

Ambient Light Fuel Bed

A palette of nine glorious colours.

As well as choosing mood matching colours for your fire's natural flame effect, you can set the colour of the ultra-realistic fuel bed too. Choose from a glowing, natural amber or take your pick from any one of eight other shades to match your mood - all easily set using your remote control. You can even set the colours to gradually transition from one shade to another, cycling through the whole palette to create an ever-changing display.

Mood Lighting (Optional)

Create the right mood in your room by lighting the area surrounding your fire.

Optional lengths of LED lighting strips are available that plug into your fire and you can run in your fireplace or build into the wall. The lights are controlled from the fire's handset and offer you a palette of thirteen glorious colours that can be set separately to the flame and fuel bed effects (they can also be set to the same colours).

Tailored Fuel Bed Options

Different looks from a choice of fuel beds.

Which look will you choose today? Traditional log fire? Ultra cool ice and crystal? The choice is yours. You can even create your own bespoke look by removing the glass front to create a mix of different fuel bed materials to your own design. Along with the standard Woodland Log Set, you can choose the Real Oak Premium Log Set with charred hand selected logs.

Ecodesign Compliant

Love your fire, love the energy you save.

Energy-saving is second nature for our fires. As well as setting thermostatic controls, you can set your fire to turn itself on and off at any time you choose and all our electric fires are built to EU and UK standards, making them Ecodesign compliant. The fire has a seven day timer setting, thermostat control and open window detection.

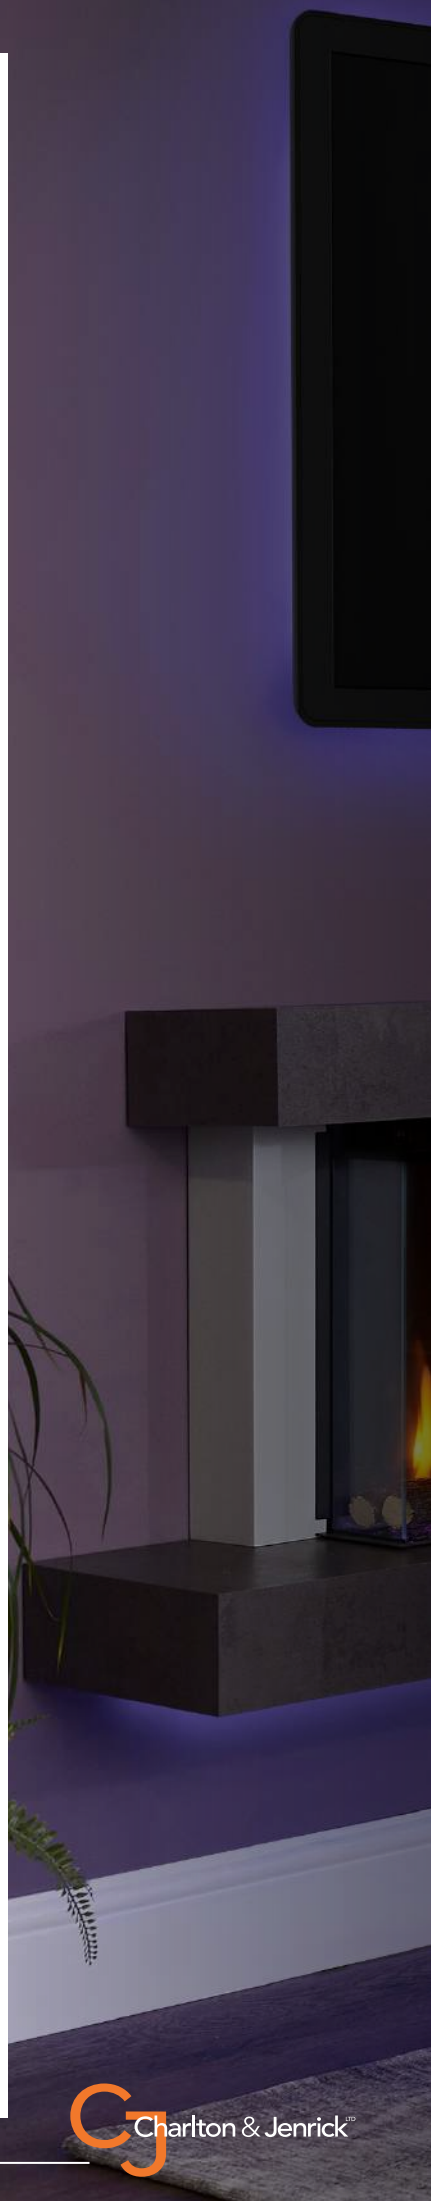

Thermocontrol Remote

Simple controls from a single handset.

Choose the lighting. Choose the flame effect. Choose to turn on the heat or simply enjoy the display. The full range of features on your fire can be controlled remotely from our slim and elegant handset.

- Remote power on and off
- See time, day and battery power
- Set timer, temperature and heating period
- View actual room temperature
- Scroll through flame and light options
- Adjust flame effect
- Change lighting levels
- Advance heating
- Two optional crackle sound effects

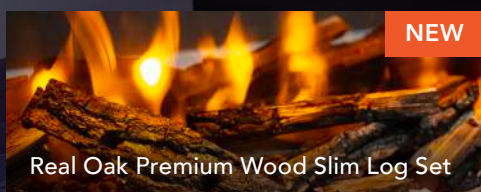

Key features

- **Tailor your fuel bed** with either our woodland log set with logs of different colours and sizes, or large crystals are also included in the box, allowing you to choose the look and feel you want. Along with the standard Woodland Log Set, you can choose the Real Oak Premium Log Set with charred hand selected logs.
- **Exciting realistic LiveFlame effect** with three colour options each available in five mood settings. The mood settings allow for five differing levels of brightness and size of flames.
- **Realistic Ambient Light flickering fuel bed** with nine colour options and four mood settings. Choose from a glowing, natural amber or take your pick from any one of eight other shades to match your mood - all easily set using your remote control. You can even set the colours to gradually shift from one shade to another, cycling through the whole palette to create an everchanging display.
- **Mood Setting (Optional)** - Create the right mood in your room by lighting the area surrounding your fire, optional lengths of LED lighting strips are available that plug into your fire and you can run in your fireplace or build into the wall. The lights are controlled from the fires handset and offer you a palette of thirteen glorious colours that can be set separately to the flame and fuel bed effects (they can also be set to the same colours).
- **Highly efficient heat control** via a 7 day programmable timer and an electric thermostat all incorporated into the stylish remote-control handset.
- **EcoDesign compliant** built to EU and UK standards that allows you to control your fire and also includes open window detection.
- **Two generous heat settings** which are chosen automatically by the temperature chosen on the remote to meet and maintain your chosen room temperature.
- **1.5kW max heat output** (100% efficient at point of use).
- **Optional wall brackets** to be able to hang the fire on the wall and build a fascia or enclosure around it.
- **All fires come with a 5 year extended parts warranty** (first 2 years parts & labour).
- **Smart App compatibility**, for full control of your fire from mobile devices.

iRange

i560e Slimline

A square fire that is perfect for inset and fireplace installations.

The most compact fire in the iRange Slimline range, the i560e offers a stunning and stylish focal point whilst utilising space efficiently.

This fire has been specifically designed with one sided installation in mind, making this fire perfect for all limestone and hole-in-the-wall installations.

There is an assortment of three flame colours to choose from, with nine other combined flame and fuel bed colour settings to choose from using the MyFlame setting.

iRange

i920e Slimline

A combination of simplicity and modern elegance.

At almost one metre, the iRange i920e Slimline strikes the ideal balance between providing a wide flame picture, and suiting all room types and sizes.

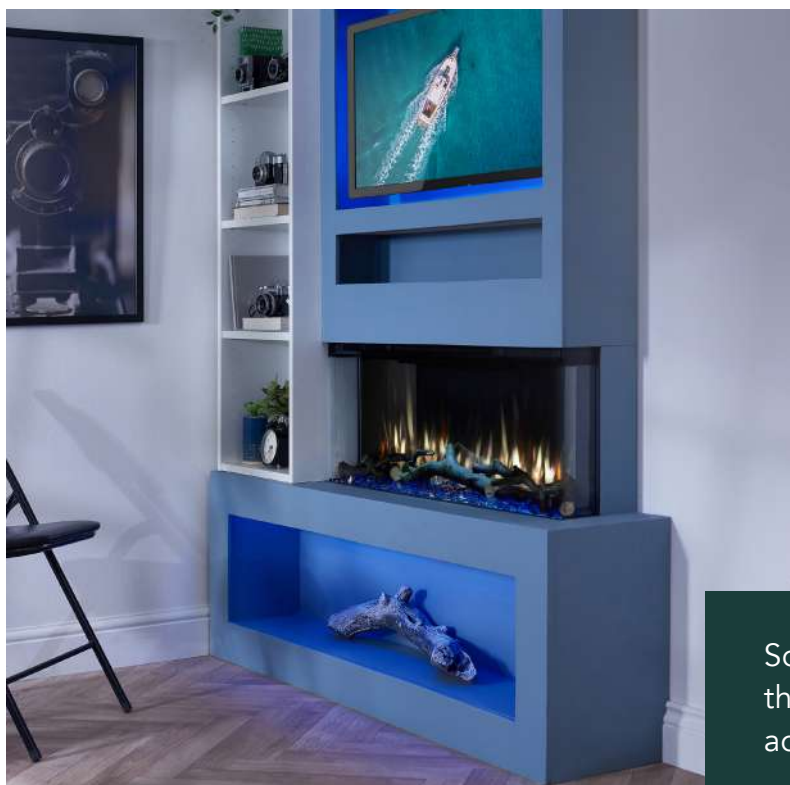

Our realistic woodland logs add to the cosy real fire ambience, featuring logs of different colours and sizes.

Installation is possible with three sides of glass, allowing you to find the perfect fit to create a statement centrepiece in your home.

Liveflame Options

A beautiful fire with flame effects to match your mood.

Relax with the mood enhancing ultra realistic flame effect with three colour options; orange, white and a combination of both. Each available in five mood settings. The mood settings offer five differing levels of brightness and size of flames.

Ambient Light Fuel Bed

A palette of nine glorious colours.

As well as choosing mood matching colours for your fire's natural flame effect, you can set the colour of the ultra-realistic fuel bed too. Choose from a glowing, natural amber or take your pick from any one of eight other shades to match your mood - all easily set using your remote control. You can even set the colours to gradually shift from one shade to another, cycling through the whole palette to create an ever-changing display.

Mood Lighting (Optional)

Create the right mood in your room by lighting the area surrounding your fire.

Optional lengths of LED lighting strips are available that plug into your fire and you can run in your fireplace or build into the wall. The lights are controlled from the fires handset and offer you a palette of thirteen glorious colours that can be set separately to the flame and fuel bed effects (they can also be set to the same colours).

Tailored Fuel Bed Options

Different looks from a choice of fuel beds.

Along with the standard woodland log set, you can choose between the optional driftwood log set, quartered split log set, Real Wood Log Set, and Real Oak Premium Log Sets.

Ecodesign Compliant

Love your fire, love the energy you save.

Energy-saving is second nature for our fires. As well as setting thermostatic controls, you can set your fire to turn itself on and off at any time you choose and all our electric fires are built to EU and UK standards, making them Ecodesign compliant. The fire has a seven day timer setting, thermostat control and open window detection.

Thermocontrol Remote

Simple controls from a single handset.

Choose the lighting. Choose the flame effect. Choose to turn on the heat or simply enjoy the display. The full range of features on your fire can be controlled remotely from our slim and elegant handset.

- Remote power on and off
- See time, day and battery power
- Set timer, temperature and heating period
- View actual room temperature
- Scroll through flame and light options
- Adjust flame effect
- Change lighting levels
- Advance heating
- Two optional crackle sound effects

Key features

- **Tailored fuel bed options.** Along with the standard woodland log set, you can choose between the optional driftwood log set, quartered split log set, Real Wood Log Set, and Real Oak Premium Log Sets. These optional log sets will allow you to change the look and feel of your fire.

Log set options

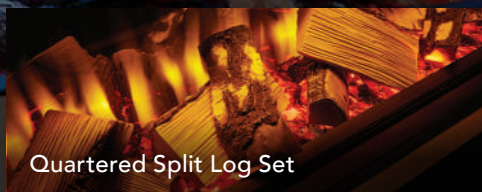

Choose the log set that best suits your interior and tastes.

Woodland Log Set

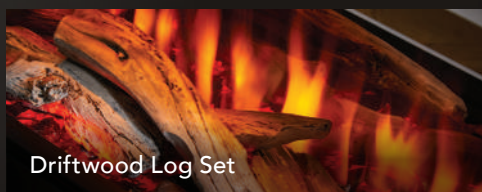

Real Wood Log Set

Quartered Split Log Set

Real Oak Premium Wood Log Set

Driftwood Log Set

Experience true indulgence by adding our real oak premium wood log set to your electric fire.

Using real wood enhances the connection to your fire, enabling you to bring nature into your home.

Each log is hand selected, creating the ultimate in bespoke fuel beds. The logs are lightly scorched to create a luxurious effect.

iRange

i750e Deep

A different take on the iRange Deep, perfect for limestone installations.

The extra tall firebox of the i750e Deep adds considerable presence, allowing for taller flames than the rest of the range.

As well as the standard woodland logs, there are also optional quartered split, driftwood logs and real wood logs to allow you to personalise your fire.

When installed in limestone fireplaces, the i750e Deep achieves the perfect balance of modern and traditional design.

i1000e Deep shown as a three-sided installation in a dividing wall with the optional Driftwood Log Set

iRange

i1250e Deep

A deeper addition to the iRange to give you more fuel bed and illumination.

The i1250e is a mid range electric fire that is ideal for feature walls and room dividers.

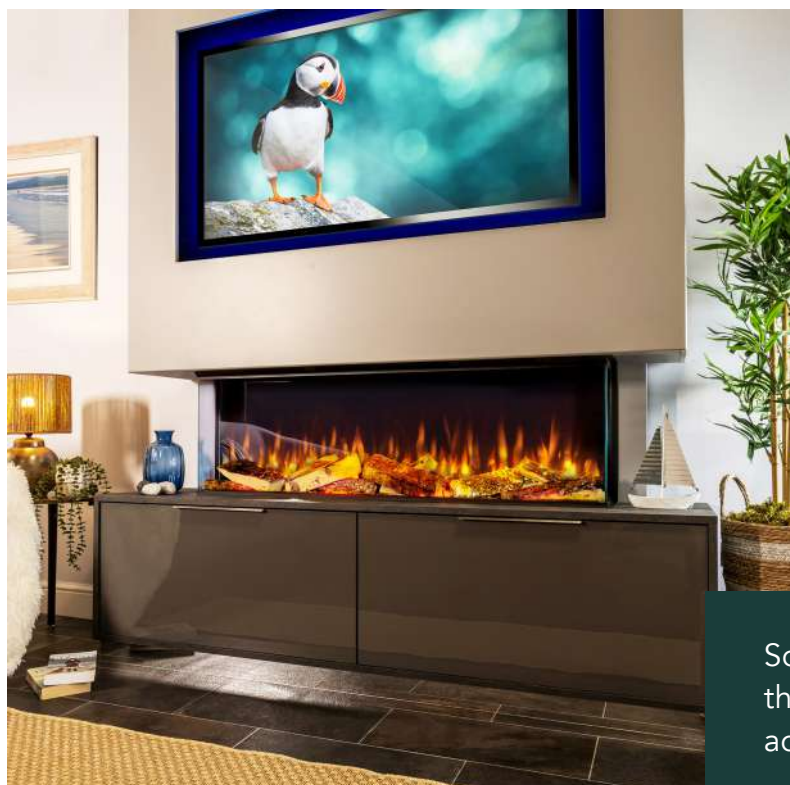

The extra depth has allowed for a chunkier log set and increased illumination of the fuel bed thanks to a unique glowing front log feature.

This fire also features the striking bright white flame setting.

Luminosa 185

The largest fire in our flagship electric range, the Luminosa 185 offers a stunning and stylish focal point.

Featuring our Real Flame Technology™ and Dark Screen Programme, the Luminosa 185 provides the most realistic flames ever seen on an electric fire.

This fire is the perfect finishing touch for your luxury home, with installation possibilities which are almost endless.

Control is easy with either the remote, or the app allowing you to effortlessly control all the features from your mobile device.

Real Flame™

Opulus 16" Inset

Bringing the compact electric fire into the 21st century.

A revolutionary take on a classic fire, the Opulus 16" brings the ultra-sharp, realistic flames from our Real Flame Technology™ to a 16" fire.

This technology adds extra visual depth to the fuel bed creating an immersive effect completing the premium impression.

Panache Range

Liveflame Options

A beautiful fire with flame effects to match your mood.

Relax with the mood enhancing ultra realistic flame effect with three colour options; orange, white and a combination of both. Each available in five mood settings. The mood settings offer five differing levels of brightness and size of flames.

Ambient Light Fuel Bed

A palette of nine glorious colours.

As well as choosing mood matching colours for your fire's natural flame effect, you can set the colour of the ultra-realistic fuel bed too. Choose from a glowing, natural amber or take your pick from any one of eight other shades to match your mood - all easily set using your remote control. You can even set the colours to gradually shift from one shade to another, cycling through the whole palette to create an ever-changing display.

Mood Lighting (Optional)

Create the right mood in your room by lighting the area surrounding your fire.

Optional lengths of LED lighting strips are available that plug into your fire and you can run in your fireplace or build into the wall. The lights are controlled from the fires handset and offer you a palette of thirteen glorious colours that can be set separately to the flame and fuel bed effects (they can also be set to the same colours).

Tailored Fuel Bed Options

Different looks from a choice of fuel beds.

Along with the standard woodland log set, you can choose the optional Real Oak Premium Wood Log Set. Enhancing your fire with hand selected, charred logs for a luxurious effect.

Ecodesign Compliant

Love your fire, love the energy you save.

Energy-saving is second nature for our fires. As well as setting thermostatic controls, you can set your fire to turn itself on and off at any time you choose and all our electric fires are built to EU and UK standards, making them Ecodesign compliant. The fire has a seven day timer setting, thermostat control and open window detection.

Thermocontrol Remote

Simple controls from a single handset.

Choose the lighting. Choose the flame effect. Choose to turn on the heat or simply enjoy the display. The full range of features on your fire can be controlled remotely from our slim and elegant handset.

- Remote power on and off
- See time, day and battery power
- Set timer, temperature and heating period
- View actual room temperature
- Scroll through flame and light options
- Adjust flame effect
- Change lighting levels
- Advance heating
- Two optional crackle sound effects

Key features

- **Tailored fuel bed options.** Different looks from a choice of fuel beds. Along with the standard woodland log set, you can choose the optional Real Oak Premium Wood Log Set. Enhancing your fire with hand selected, charred logs for a luxurious effect.
- **Exciting realistic LiveFlame effect** with three colour options each available in five mood settings. The mood settings allow for five differing levels of brightness and size of flames.
- **Realistic Ambient Light flickering fuel bed** with nine colour options and four mood settings. Choose from a glowing, natural amber or take your pick from any one of eight other shades to match your mood - all easily set using your remote control. You can even set the colours to gradually transition from one shade to another, cycling through the whole palette to create an everchanging display.
- **Mood Setting (Optional)** - Create the right mood in your room by lighting the area surrounding your fire, optional lengths of LED lighting strips are available that plug into your fire and you can run in your fireplace or build into the wall. The lights are controlled from the fire's handset and offer you a palette of thirteen glorious colours that can be set separately to the flame and fuel bed effects (they can also be set to the same colours).
- **Highly efficient heat control** via a 7 day programmable timer and an electric thermostat all incorporated into the stylish remote-control handset.
- **EcoDesign** compliant built to EU and UK standards that allows you to control your fire and also includes open window detection.
- **Two generous heat settings** which are chosen automatically by the temperature chosen on the remote to meet and maintain your chosen room temperature.
- **2kW max heat output** (100% efficient at point of use).
- **All fires come with a 5 year extended parts warranty** (first 2 years parts & labour).
- **Smart App compatibility**, for full control of your fire from mobile devices.

Upgraded Deeper Fuel Bed

Our Deepest fuel bed ever on a 16" electric fire

Panache

16 Deep

The deepest fuel bed in a 16" electric fire.

The Panache 16 Deep Electric fire features a deeper fuel bed than is typically found in a 16" fire. This helps to accommodate bigger logs, with the reflections in the black glass liners creating a luxurious effect.

Customisation is possible with multiple log options including our Real Oak Premium Log Set, and optional LED lights to enhance the fireplace feature.

Ecoflame™

Range

Contemporary or Traditional?

Suitable for any room, whether traditional or contemporary, incorporating realistic flame effects from 3D Ecoflame™ and 4D Ecoflame™ technology which brings a comforting warmth to any home.

A popular choice for people who prefer electric to gas - their versatility and low watt usage allows them to be fitted anywhere there is an electric supply, making them viable for use in apartments, flats, remote locations, houses without chimneys/flues and where there are no options to use gas.

- Mix and match frets and trims to suit your room
- Suitable for use where gas isn't an option
- Realistic flame effects give your room a warm welcoming feel
- Various fuel bed options available

4D Ecoflame™ Fascia LED Lighting

Thirteen colour options, colour morphing and four mood settings.

All Charlton & Jenrick Elite Fascias now come with the option of patented LED trim lights that are controlled by the fire's remote control.

There is an optional 1 metre length of LED lighting strip that is available and can be fitted into a fireplace or surround and controlled by the fire. There are thirteen colour options and a colour morphing setting, each available in four mood settings.

Please note that this optional strip can not be used if the LED lights are being used on the Fascia. It is a choice of either fascia lights or 1 metre length. Remote control handset designs vary according to fire model.

Intelligently designed electric fires with versatility in mind

Key features

- Included in the box are loose **realistic log, glass beads and coal fuel bed** - use all three together if you wish!
 - Optional Real Oak Premium Log Set, enhances your electric fire with hand selected, charred logs.
 - **Exciting realistic flame effect** with 4 mood settings with choice of warm dark orange flame or orange and blue flame.
 - **Remote control** with timer and thermostat built in.
 - **Realistic active flame** images appear from the middle of the fuel bed created by Charlton & Jenrick's superb 3D reflection technology.
 - **High-level side buttons** for easy access.
 - **Two generous heat settings** - Low 0.75kW and High 1.5kW.
 - **1.5kW max heat output** (100% efficient at point of use).
 - Fits most Charlton & Jenrick frets and fascias.
 - Fully EU Ecodesign compliant and UKCA approved.
-
- **Exciting ultra-realistic flame effect** with three colour options each available in four mood settings. The mood setting offers four differing levels of brightness and flame size.
 - **Realistic flickering fuel bed** with thirteen colour options and a colour morphing setting, each available in four mood settings.
 - **Multiple fuel bed options** including realistic log, coal, ice crystals small and large and glowing embers. All are included with the fire for the user to decide.
 - **Highly efficient heat control** via a 7-day programmable timer and an electric thermostat all incorporated into the stylish remote-control.
 - **High-level side buttons** for easy access and alternative control of flame effect and the fuel bed.
 - **Two generous heat settings** which are chosen automatically by the temperature chosen on the remote to meet and maintain your chosen room temperature.
 - **Realistic active flame** images appear from the middle of the fuel bed created by C&J's superb 4D reflection technology.
 - **1.5kW max heat output** (100% efficient at point of use).
 - Fits most Charlton & Jenrick Frets and Fascias with many fire and fascia packages available.
 - Fits most 16" fireplace openings.
 - Fully EU Ecodesign compliant and UKCA approved.

Ecoflame™

3D Ecoflame Electric Stoves

With today's highly efficient homes it is not always necessary to have a gas or wood burning stove in your room or fitting such an appliance may just not be possible. If however you want the warmth from the look and feel of a stove in your home but without the need for such high heat outputs then an electric stove is the ideal choice.

The C&J electric stoves come with a choice of doors; curved, square or Alcaston which features a tracery door. The doors are all cast iron and fit on the strong steel body of the stove which are built from a 5mm thick laser profiled steel plate.

The stoves have an ultra-realistic flame effect thanks to the 3D Ecoflame™ technology from Charlton & Jenrick Ltd.

Product highlights

- Loose realistic log fuel bed
- Optional Real Oak Premium Log Set, emulating the look and feel of a real wood-burning stove
- Exciting realistic flame effect with four mood settings
- Remote control with timer and thermostat built into the fire
- Two generous heat settings - Low 1kW and High 2kW
- Heavy duty steel construction
- Quality solid cast iron door
- Three door options - tracery, curved, and square
- Optional log store and flue pipe accessories.

C&JSmartFire App Control

The C&JSmartFire App allows you to control the latest electric models from the comfort of your chair.

Convenient Control

Easily turn your fire on and off and control basic heating controls with a few clicks.

Full Control of The Flames

Choose between six pre-set colours and three MY FLAME settings for custom colours as well as the option to control the brightness of the flames.

Scheduling Fire Controls

Schedule flame and heating settings with up to four time periods a day and three different weekly schedule patterns available.

Fuel Beds

Choose between seven pre-set colours and two custom colour settings as well as the option to control the brightness of the fuel bed.

Optional Mood Lighting

Choose between thirteen different colour options, and a fourteenth option that cycles through all the colours as well as the option to control the brightness of the led lighting.

Optional Crackle Sound Effects

Choose between the optional relaxing fire crackling sound effects and control their volume, or run the fire without any sound effects.

Synchronise Visuals

Synchronise the flames, fuel bed, and mood lighting to create one cohesive visual effect.

Thermostatic Temperature Control

A thermostat shows the current room temperature on the app, and you can set a desired temperature for a specified amount of time using the timer function.

Work Across Devices

Available on android and iOS allowing for operation from all your devices.

Fire Compatibility

Compatible with the iRange Slimline, iRange Deep, Luminosa and Opulus ranges.

Download the C&JSmartFire App from the Google Play and Apple App Store

Company Certifications

The **UKCA (UK Conformity Assessed) mark** is the UK product mark that the CE mark for products being placed on the market in Great Britain (England, Wales and Scotland). It covers most products that previously required the CE mark. All our fires comply to this.

Gas Safe Register is the mandatory national competent persons scheme to allow work on gas fittings and appliances in customers' homes. Our service and most of the sales team have completed the regular training courses and sit the regular exams to ensure our customers have the best support and service.

ISO9001 is the internationally recognised standard for Quality Management Systems which in our case includes the activity of product design and development as well as production, sale and support functions. Annual independent audits and certification ensure continued compliance in producing consistent quality products.

HHIC, the Heating and Hot Water Information Council is a trade body representing the UK gas fire industry. As part of the Energy and Utilities Alliance, within the HHIC we have an input into EU and UK standards committees, communicate with Government departments and keep abreast of serious issues affecting the gas fire industry.

ISO14001 is the internationally recognised standard for Environmental Management Systems. Once again this independently audited and certified system makes sure that we are regularly monitoring and reviewing the impact of the business and its products to ensure we minimise negative impacts and promote best practice.

SIA, the Stove Industry Association is the UK trade body for the solid fuel stove industry. C&J are members of the Executive Committee and Technical Committee enabling input into UK and EU standards committees and lines of communication into Government departments and keeping up to date on a wide range of issues affecting the industry.

clearSkies is a certification mark for Emissions and Energy Performance of domestic wood and solid fuel stoves and fireplaces. clearSkies ratings, namely the certification levels, will show appliances that meet defined emissions and efficiency thresholds that exceed the minimum requirements set by the ecodesign regulation.

CE marking of products is mandatory for electric, gas, and wood-burning fires and stoves in Europe. We always invest in independent testing and certification to ensure our products meet all necessary requirements for the regions we operate in.

The Charlton and Jenrick Way

Our Heritage

Since being established in 1986, we have grown and now sell products across all fuel types.

Regardless of whether you need a gas, wood-burning, solid-fuel, or electric appliance we have a product to fit your needs.

See our full range at:

charltonandjenrick.co.uk

See One of Our Products Live

We believe you need to see one of our product with your own eyes before purchasing, to fully understand how it fits into your home.

This is why we sell through a network of over 400 independent fireplace showrooms right across the UK.

See our other product ranges

Purevision

State of the art design for the ultimate in luxury stoves.

Fireline

A range of modern and traditional designs, the Fireline range has the perfect stove for you.

Go Eco

A range of glamping, cooking and conventional stoves for home and glamping environments.

Gas

Gas stoves, inset fires, and large format fires to suit every interior style.

Please note: Our policy is one of constant development and improvement. Charlton and Jenrick therefore reserves the right to revise the specification and design of its products without formal notice. This brochure is presented as a guide to aid in your decision and does not replace the need for technical assessment by your dealer. Whilst the utmost care is taken in preparation of this brochure, it is not intended to replace the installation manual which provides more detailed information. Photography is for illustration purposes only and does not replace the need to see the product in a showroom. We accept no liability for any loss or damage arising either directly or indirectly from the use of this brochure.
